Specialized Disclosure Report

Applied Optoelectronics, Inc. (Exact name of Registrant as specified in its charter)

Delaware

(State or Other Jurisdiction of Incorporation or Organization)

001-36083

(Commission File Number)

76-0533927 (I.R.S. Employer

Identification No.)

13139 Jess Pirtle Blvd. Sugar Land, TX 77478

(Address of principal executive offices and zip code)

David C. Kuo, General Counsel and Secretary (281) 295-1800

(Name and telephone number, including area code of the person to contact in connection with this Report)

Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

ü Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2019.

Section 1 - Conflict Minerals Disclosure

Items 1.01 and 1.02 Conflict Minerals Disclosure and Report; Exhibit

This Form SD of Applied Optoelectronics, Inc. (the "Company") is filed pursuant to Rule 13p-1 under the Securities Exchange Act of 1934 (the "Rule") for the reporting period from January 1, 2019 to December 31, 2019.

Certain Conflict Minerals (as defined in paragraph (d)(3) of Item 1.01) are necessary to the functionality or production of certain products manufactured by the Company. We conducted in good faith a Reasonable Country of Origin Inquiry (RCOI) on the source of our Conflict Minerals for 2019. Based on the responses to our RCOI, we have reason to believe that, during the period covered by this report, certain of such Conflict Minerals likely originated in the Democratic Republic of the Congo (the "DRC") and/or one or more of the countries that share an internationally recognized border with the DRC. Accordingly, the Company has prepared a Conflict Minerals Report, a copy of which is attached hereto as Exhibit 1.01. The Conflict Minerals Report is also publicly available on the Company's website at http://ao-inc.com/about-our-company/global-compliance. The Company is filing its Conflict Minerals Report for the reporting period January 1, 2019 to December 31, 2019 as Exhibit 1.01 to this report as required by Item 1.01.

Section 2 - Exhibits

Item 2.01 Exhibits

Exhibit 1.01 – Conflict Minerals Report for the reporting period January 1, 2019 to December 31, 2019 as required by Items 1.01 and 1.02 of this Form,

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Company has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

Date: May 27, 2020 APPLIED OPTOELECTRONICS, INC.

By: /s/ DAVID C. KUO

Name: David C. Kuo

Title: General Counsel and Secretary

Applied Optoelectronics, Inc. Conflict Minerals Report For The Year Ended December 31, 2019

This report for the year ended December 31, 2019 is presented to comply with Rule 13p-1 under the Securities Exchange Act of 1934, as amended (the "Rule"). The Rule was adopted by the Securities and Exchange Commission ("SEC") to implement reporting and disclosure requirements related to conflict minerals as directed by the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010. The Rule imposes certain reporting obligations on SEC registrants whose manufactured products contain Conflict Minerals which are necessary to the functionality or production of their products. Conflict Minerals are defined as cassiterite, columbite-tantalite, gold, wolframite, and their derivatives, which under current guidance are limited to tin, tantalum, and tungsten ("3Ts"). These requirements apply to registrants whatever the geographic origin of the Conflict Minerals and whether or not they fund armed conflict.

1. Company Overview

This report has been prepared by the management of Applied Optoelectronics, Inc. (herein referred to as "AOI," the "Company," "we," "us," or "our"). The information includes the activities of all majority-owned subsidiaries.

AOI is a leading, vertically integrated provider of fiber-optic networking products, primarily for four networking end-markets: internet data center, cable television, or CATV, and fiber-to-the-home, or FTTH, and telecom. We design and manufacture a range of optical communications products at varying levels of integration, from components, subassemblies and modules to complete turn-key equipment. Conflict Minerals are necessary to the functionality or production of semiconductor and module products.

In designing products for our customers, we begin with the fundamental building blocks of lasers and laser components, which require the use of metals, including the 3Ts and gold ("3TG"). From these foundational products, we design and manufacture a wide range of products to meet our customers' needs and specifications, and such products differ from each other by their end market, intended use and level of integration. We are primarily focused on the higher-performance segments within all four of our target markets, which increasingly demand faster connectivity and innovation. Therefore, the majority of our semiconductor and module products, as well as components that are part of those products, require the use of Conflict Minerals.

2. Supply Chain

The supply chain for 3TG consists of many supplier chain tiers. Before reaching AOI's direct suppliers, 3TG will go from mines, to traders, exporters, smelters or refiners (referred to collectively as smelters), alloy producers and component manufacturers, and sometimes intermediate suppliers. Since one or more of the 3TG metals are contained in the majority of AOI's products, a significant portion of AOI's suppliers also use these metals in their products. AOI sources products and components from approximately 490 first tier suppliers globally. First tier suppliers are those suppliers that AOI selected and with whom we have a direct business relationship. These first tier suppliers select their suppliers (second tier suppliers), which in turn have their own group of suppliers (third tier), and so on. AOI works with and through its first tier suppliers to investigate the deeper levels of our supply chain, in order to determine the origin of 3TG metals contained in AOI products.

Because of our size, the complexity of our products, and the depth, breadth, and constant evolution of our supply chain, it is difficult to identify actors upstream from our direct suppliers. Accordingly, we participate in a number of industry-wide initiatives as described below.

3. Conflict Minerals Policy

AOI is committed to working with our global supply chain to ensure compliance with the SEC's conflict minerals rules. We have established a conflict minerals compliance program that is designed to follow the framework established by the Organization for Economic Co-operation and Development ("OECD").

Pursuant to our conflict minerals compliance program, our supplier contracts include conflict mineral due diligence and reporting requirements. Any direct sourcing by AOI of tin, tungsten, tantalum and gold is sourced with the goal that it only be from Democratic Republic of Congo Conflict-Free sources, as defined in the SEC's conflict minerals rule. As we become aware of instances where minerals in our supply chain potentially finance armed groups, as defined in the SEC's conflict minerals rule, we work with our suppliers to find alternate conflict-free sources.

Our policy is publicly available on our website at http://ao-inc.com/about-our-company/global-compliance.

4. Due Diligence Overview

We conducted a survey of our supply chain by adopting the template developed by the Responsible Business Alliance ("RBA") and Global e-Sustainability Initiative ("GeSI"), known as the Responsible Minerals Initiative ("RMI") Conflict Minerals Reporting Template ("CMRT"). The CMRT was developed to facilitate disclosure and communication of information regarding smelters that provide material to a company's supply chain. It includes questions regarding a company's conflict-free policy, engagement with its direct suppliers, and a listing of the smelters the company and its suppliers use. In addition, the template contains questions about the origin of conflict minerals included in their products, as well as supplier due diligence. Written instructions and recorded training illustrating the use of the tool is available on RBA's website. The CMRT is being used by many companies in their due diligence processes related to conflict minerals.

AOI does not engage directly with mines or smelters and thus AOI does not have information on 3TG country of origin. We rely on information from the Responsible Minerals Assurance Process ("RMAP"), a voluntary initiative managed by the RMI in which an independent third party audits the procurement activities of a smelter or refiner to determine, with reasonable confidence that the minerals it processes originated from conflict-free sources. Upon completion of a successful audit, the smelter or refiner is designated by the RMI as "Compliant."

5. Due Diligence Process

AOI has established management systems and due diligence measures as a basis for supply-chain management and disclosure compliance relating to the Conflict Minerals necessary to the functionality or production of our products and required to be reported under the Rule.

Our due diligence measures have been designed to conform, in all material respects, to the five-step framework in the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas (OECD Guidance). The design of AOI's Conflict Mineral Process includes the following:

Step #1: Establish Strong Company Management Systems

- · AOI's management is committed to sourcing conflict free materials. A conflict minerals policy was adopted and is available on our website at http://ao-inc.com/about-our-company/global-compliance.
- Our commitment is reflected in our Quality Objective, Purchasing Agreements, Purchasing Orders and SOPs,

Step #2: Identify and Assess Risk in the Supply Chain

- · AOI requests that its suppliers complete in full the CMRT. The CMRT is used to provide AOI with information regarding its suppliers' practices with respect to the sourcing of conflict minerals to enable it to comply with its requirements under the Rule.
- · AOI's legal, quality assurance and supply chain departments manage the collection of information reported on the CMRT by its suppliers.
- · Once AOI receives CMRTs from our supply chain, we identify high risk vendors. High risk vendors are those that use non RMI-Compliant smelters or those that do not submit a completed CMRT.

Step #3: Design and Implement a Strategy to Respond to Identified Risks

- · Once a high risk vendor has been identified, AOI will hold an internal stakeholders meeting to discuss corrective actions to be taken.
- · Such corrective actions include, but are not limited to, disengaging in trade with the high risk vendor and finding alternate vendors.

Step #4: Carry Out Independent Third-Party Audit of Supply Chain Due Diligence at Identified Points in the Supply Chain

- · Given that we do not have a direct relationship with the smelters and refiners that process the conflict minerals that are present in our products, we rely on the RMI to conduct third-party audits of smelters and refiners.
- · AOI relies on the RBA and GeSI initiative to validate supply chain due diligence.
- \cdot AOI expects our supply chain to adhere to all local, national and international laws and requirements.

· As a publicly traded company in the United States, AOI will submit an annual SD Report to the SEC per the Securities and Exchange Act of 1934 Section 1502 as amended by the Dodd-Frank Act of 2010.

6. Due Diligence Performed

Annually, AOI requests CMRTs from our supply chain. It is the responsibility of our supply chain to provide AOI with a CMRT and to ensure their supply chains are conflict free. Once AOI receives the completed CMRT, AOI will review the submission for completeness and consistency. AOI will then compare smelter data, made available by the RMI, concerning the country of origin. If a vendor submits a CMRT that does not contain a non RMI-Compliant smelter, then no further action will be taken by AOI.

For vendors that do not submit a CMRT, AOI will follow up with the vendor and continue to request a completed CMRT. If the vendor does not submit a CMRT after multiple requests, then corrective actions, up to and including disengaging in trade, will be taken.

For vendors that submit a CMRT containing a non RMI-Compliant smelter, AOI will request that the vendor take corrective actions and become conflict free. If the vendor does not satisfactorily implement steps to become conflict free, then corrective actions, up to and including disengaging in trade, will be taken.

AOI works with and through its first tier suppliers to investigate the deeper levels of our supply chain, in an effort to determine the origin of 3TG metals contained in AOI products.

7. Due Diligence Results

The results of our due diligence indicates that the sources of Conflict Minerals are (1) from recycled or scrap materials, (2) from within the Democratic Republic of the Congo or adjoining countries (the "Covered Countries"), or (3) from outside the Covered Countries. From the responses we have received from our direct suppliers from our supply chain survey for 2019, 260 smelters and refiners were listed within their supply chains. All 260 have been designated as of December 31, 2019 as Active or Compliant under the RMAP. The complete list of smelters and refiners is attached in Exhibit A.

AOI does not engage directly with mines or smelters and thus AOI does not have information on 3TG country of origin.

8. Conflict-Free Sourcing Continuous Improvements

As part of AOI's commitment to Conflict Minerals due diligence, AOI has taken, or will take, the following steps to further mitigate the risk that our Conflict Minerals benefit armed groups in the Covered Countries:

- · Continue to engage with suppliers to obtain complete CMRTs;
- Encourage the development of supplier capabilities to perform conflict-minerals related due diligence;
- · Review our supply chain quarterly to ensure new vendors are aware of the conflict-mineral free policy and to encourage existing vendors to submit their CMRTs timely;
- · Provide ongoing training regarding emerging best practices and other relevant topics to legal, quality assurance and supply chain staff responsible for conflict mineral compliance.

9. Forward-looking Statements

Statements relating to due diligence improvements are forward-looking in nature and are based on our management's current expectations or beliefs. Forward-looking statements can also be identified by words such as "expects," "plans," "intends," "will," "may," and similar terms. These forward-looking statements are not a guarantee of performance and are subject to a number of uncertainties and other factors that may be outside of our control and that could cause actual events to differ materially from those expressed or implied by the statements made herein. Subsequent events may affect AOI's future determinations under Rule 13p-1.

10. Conflict Minerals Disclosure

This Conflict Minerals Report and our Conflict Minerals Policy are available on our web site at http://ao-inc.com/about-our-company/global-compliance.
